PRODUCTS

CLASS 3316 88 - ATTESTATION - Scalable hydrogen fueling appliance - Certified-to US standards

The table below lists the scalable hydrogen fueling appliance models and their authorized configurations:

Models	Cell Stack	Voltage (V)	Current (A)	Storage (kg)	Number of tanks	Production per day (kg)
100 (C)	55	240 1φ	50	4	4	2
102 (C)	55	240 1φ	50	6	6	2
104 (C)	55	240 1φ	50	8	8	2
200 (C)	114	240 1φ	60	8	8	4
300 (C)	6 x 55 or 3 x 114	240 1φ (4)	50 (4) breakers	24	24	12

Maximum fueling pressure 41.360 MPa (6000 psi)

Dispenser operates within the ambient temperature range of 2°C to 33°C

Model numbers: 100, 102, 104, 200, 300. These models are intended to fill 70Mpa vehicle tank systems only. Models 100C, 102C, 104C, 200C, and 300C must be equipped with a regulator set at 33.1MPa gage, which may fill 35Mpa vehicle tanks.

Certificate: 70205878

Project: 70205878

Master Contract: 274177

Date Issued: November 27, 2018

The SHFA are for indoor and outdoor installation and non-residential and residential use.

APPLICABLE REQUIREMENTS

CSA IR 3-18 Scalable Hydrogen Fueling Appliance

Supplement to Certificate of Compliance

Certificate: 70205878

Master Contract: 274177

*The products listed, including the latest revision described below,
are eligible to be marked in accordance with the referenced Certificate.*
